Composites Science and Technology **35** (1989) 405–406

SUBJECT INDEX TO VOLUME 35

Acoustic emission, 13, 78, 211
Alumina reinforced MMC, 1, 195
Aluminium matrix MMC, 1, 105, 126, 159, 195
Aluminium/SiC MMC (particulate), 159
Anisotropic viscoelasticity, 273

Back-extrusion (MMC), 105

Carbon fibre/PEEK, 31
Carbon/PEEK (diaphragm forming), 235
Carbon/PEEK composites (fracture), 301
Cell structure (in MMC), 168
Creep (wood/polymer composites), 257
CVD filament MMC, 207

Damage development, 146
DCB tests, 34, 283, 301
Diaphragm forming, 235
Dynamic elastic behaviour, 77

Edge delamination, 219
Effect of moisture on laminates, 219
Elastic/plastic materials, 352
End corrections (DCB specimens), 367
Extrusion (MMC), 105, 121, 127, 133

Failure sequences, 337
Fibre bridging (GRP composites), 283
Fibre distributions (MMC), 105, 200
Fibre surface coatings, 211
Finite difference method, 183
Finite element analysis, 347
Flow casting (MMC), 3
Fluidity (in casting MMC), 165
Fracture mechanics, 34, 283, 301
Fracture toughness, 45
Fragmentation, 23

High-temperature deformation (MMC), 121, 181
Hybrid composites, 331

Interfacial shear strength, 25, 207
Interlaminated hybrids, 331

Laminate theory, 53

Metal matrix composites (MMC), 1, 53, 105, 121, 159, 181, 195, 347
Micromechanical models, 349
Modulus changes on loading, 384
Monté Carlo simulation, 16, 188

Composites Science and Technology (**35**) (1989)—© 1989 Elsevier Science Publishers Ltd, England. Printed in Great Britain

Non-destructive evaluation, 244
Non-linear creep, 257
Non-linear finite elements, 355
Non-linear stress analysis, 259

Orthotropic DCBS (end corrections), 367
Orthotropic viscoplasticity, 53

Particulate composites (MMC), 159
Periodic hexagonal arrays (PHA), 350
Ply cracking (symmetric laminates), 377
Poly(ether ether ketone) (PEEK), 33
Probabilistic strength analysis, 331
Process optimization, 151
Property degradation, 377

Radiation curing, 257
Recursion analysis, 190
Resin front movement (RFM), 322
Resin impregnation, 317
Resin transfer moulding, 317

Saffil, 1, 126, 195, 221
Shear-lag theory, 182
SiC CVD filaments, 207
SiC whisker reinforced aluminium, 105
Single fibre fragmentation tests, 13, 208
Static fatigue (carbon/PEEK), 311
Strain concentration factor, 332, 339
Strain energy release rate, 219
Strain-rate effects (MMC), 146
Surface coatings (for CVD fibres), 211

Temperature effects, 219
Thermoplastic composites (forming), 235
Time-dependent behaviour (CFRP), 75
Titanium alloy MMC, 207
Tool design (diaphragm forming), 238
Transverse cracking, 379

Unstable fracture, 50

Viscoelastic behaviour (CFRP), 75
Viscoelastic equations, 274
Viscoplasticity, 53

Weibull distribution, 17
Whiskers (SiC), 105, 126

AUTHOR INDEX TO VOLUME 35
